

Criteria	Does Not Meet Specifications	Meets Specifications	Exceeds Specifications (Completely Udacious)
Critical Rendering Path for index.html	Student does not identify opportunities or perform any optimizations that impact the critical rendering path on index.html.	Student identifies and performs optimizations to achieve a PageSpeed score of 90 on index.html.	Student identifies and performs optimizations to achieve a PageSpeed score above 90 on index.html.
Framerate for pizza.html	Student does not identify opportunities or perform any optimizations that impact the frame rate when scrolling in pizza.html.	Student identifies and performs optimizations ensuring a consistent frame rate at 60fps when scrolling in pizza.html.	Not applicable.
Computation Efficiency for pizza.html	Time to resize pizzas is greater than 5 ms in pizza.html shown in the browser console.	Time to resize pizzas is less than 5 ms in pizza.html shown in the browser console.	
Build Tools	Not applicable.		Student researches, identifies and uses build tools to automatically perform optimizations such as minification of CSS and JS and image optimizations.
Comments	Comments are not present in views/js/main.js for pizza.html code or existing comments do not effectively explain code segments.	Comments in views/js/main.js for pizza.html are present and effectively explain longer code procedures.	Not applicable.
Documentation	No README file is included or the file is incomplete.	A README file is included detailing all steps required to successfully run the application and outlines the optimizations that the student made in views/js/main.js for pizza.html.
